Five Years of PPC blue Greece's largest public EV charging network expands dynamically across Southeastern Europe

- *More than 4,700 charging points across 1,400+ locations in Greece and Romania*
- *Over 600 DC/HPDC fast charging points in Greece and 46 PPC blue Hubs at strategic locations along the country's national road network*
- *Dynamic expansion in Romania with more than 1,400 charging points across 450+ locations*
- *Membership in ChargeUp Europe*

PPC blue marks five years of continuous growth and investment in sustainable mobility, having developed a network of more than **4,700 public charging points across Greece and Romania**. Through modern infrastructure, innovative digital services and a strong focus on enhancing driver experience, **PPC blue continues to accelerate the transition to electric mobility**.

Greece's largest public EV charging network

The PPC blue public charging network now comprises more than **3,300 charging points across 970+ locations** throughout Greece, making it the country's largest public EV charging network. More than **600 DC/HPDC fast charging points**, together with **46 PPC blue Hubs** at key locations along the national road network, significantly enhance public charging capacity across the country. Network infrastructures have been designed to meet modern accessibility standards, including dedicated features for people with disabilities.

At the same time, PPC blue continues to expand its presence into new destinations. Since last winter, a total of **54 charging points** have been operating at Greece's seven largest ski resorts, further strengthening the country's EV charging infrastructure in popular mountain destinations.

Dynamic growth across Southeastern Europe

PPC blue's growth extends beyond Greece. In Romania, the PPC blue network now exceeds **1,400 charging points across 450+ locations**, with a presence in all **41 counties** of the country.

At the same time, PPC blue's membership in **ChargeUp Europe**—the association representing the electric vehicle charging infrastructure industry at European level—reinforces its active role in shaping the future of electric mobility across Europe.

An enhanced charging experience

The **PPC blue** app, available for iOS and Android devices, enables drivers to locate and reserve fast chargers, plan their journeys through the **PPC blueTrips** service, access exclusive benefits and reward programs, while using the network across all countries where PPC blue operates. In addition, the **PPC blue RFID card** offers even greater convenience and flexibility by allowing drivers to start a charging session without using the mobile application. Also, customer experience is further enhanced through the **Recharge | Reward** loyalty program, which offers exclusive benefits to drivers charging on the PPC blue network.

At the same time, **24/7 customer support** provides immediate assistance and high-quality service, ensuring that drivers receive support whenever they need it.
